

# Zoonotic *Chlamydiaceae* Species associated with Trachoma, Nepal

## Technical Appendix

Technical Appendix Table. Association of ArrayTube results with real-time PCR and *ompA* genotyping\*

| Nepal sample no. | Species identity (by ArrayTube)     | <i>ompA</i> genotype(s)†     |
|------------------|-------------------------------------|------------------------------|
| 1                | <i>Chlamydia trachomatis</i>        | C                            |
| 2                | <i>C. trachomatis</i>               | E                            |
| 3                | <i>C. trachomatis</i>               | L2                           |
| 4                | <i>C. trachomatis</i>               | L2                           |
| 5                | <i>C. trachomatis + C. suis</i>     | B + <i>C. suis</i>           |
| 6                | <i>C. trachomatis + C. suis</i>     | F + <i>C. suis</i>           |
| 7                | <i>C. trachomatis</i>               | E                            |
