

Histoplasmosis in Idaho and Montana, USA, 2012–2013

Technical Appendix

Technical Appendix Table. Laboratory findings in histoplasmosis patients, Idaho and Montana, USA, 2012–2013*

Case no.	Residence	Year of symptom onset	Specimen source	Interval from symptom onset to testing	Culture results	Histopathology results	<i>H. capsulatum</i> antigen EIA	<i>H. capsulatum</i> antibody by compliment fixation
1	SW Idaho	2012	Urine	1	No growth	Necrotizing granulomatous inflammation with rare budding yeast consistent with <i>H. capsulatum</i>	Positive	
			Blood	<1			Positive	
			Blood	2				
			Nasal tissue	2				
2	SW Montana	2011	Urine	21	<i>H. capsulatum</i>	Lymphoepithelial cyst and necrotizing granulomatous inflammation with rare fungal yeast forms consistent with <i>H. capsulatum</i>	Negative	
			Parotid gland	20				
3	SW Montana	2011	Urine	14	<i>H. capsulatum</i>	Necrotizing granulomatous inflammation with yeast forms consistent with <i>H. capsulatum</i>	Negative	
			Lymph node	13				
4	SW Montana	2013	Urine	<1			Positive	
5	E Montana	2012	Lung tissue	6	<i>H. capsulatum</i>		Positive	
6	E Montana	2013	Urine	<1	No growth		Positive	
			Blood	<1				<1:8
			Blood	<1				

*E, eastern; EIA, enzyme immunoassay; *H. capsulatum*, *Histoplasma capsulatum*; SW, southwestern.
