

# Outbreak of Vaccinia Virus Infection from Occupational Exposure, China, 2017

## Appendix

**Appendix Figure.** Timeline of exposure and outbreak investigation of vaccinia virus infection, China, March 2017. Blue bars indicate onset of symptoms in 5 case-patients, A–E, who pulverized frozen rabbit skins at a powder processing company. The skins were from rabbits inoculated with smallpox vaccine at a biopharmaceutical company 5 days before being brought to the powder processing company.
