To the Editor: We would like to retract our article Novel Orthobunyavirus Causing Severe Kidney Disease in Broiler Chickens, Malaysia, 2014–2017 from the June 2019 issue of Emerging

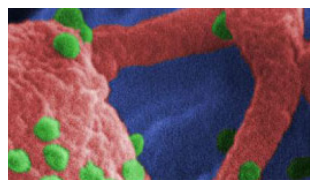

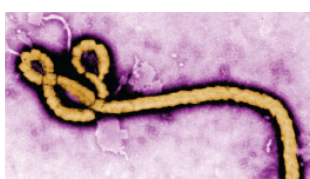

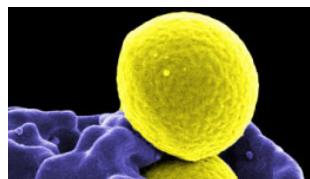

Infectious Diseases (1). We assert that research was performed in good faith, that all the experimental data contained in the article are well founded and scientifically valid, and that there was no scientific misconduct. However, we subsequently were made aware of further information about the epidemiologic and clinical observations made locally in Malaysia, which brings into question the geographic location where the noted virus originated. Thus, we request this article's retraction.
