

# Molecular Typing of *Burkholderia mallei* Isolates from Equids with Glanders, India

## Appendix 1

**Appendix 1 Figure.** Distribution of the *Burkholderia mallei* isolates in Himachal Pradesh, Uttar Pradesh, Gujarat, and Haryana states included in this study. The dashed circle indicates glanders hotspot zone encompassing 14 districts (~55,000 km<sup>2</sup>) in western part of Uttar Pradesh. Dashed arrow suggests interstate migration of equids implicated in glanders outbreak in Himachal Pradesh. Source: <https://www.mapsofindia.com>.
