Appendix Figure. Neighbor-joining SNP-based phylogenetic tree of sequences from BICU isolates (red), isolates collected from the same facility (pink) or another facility within the medical system (blue) and all publicly available Illinois sequences available as of April 2024 (gray) (Appendix Table 1). Facility source for 314 of 361 Illinois contextual sequences was confirmed not to be within the BICU medical system. The facility source of the remaining 47 of 361 isolate sequences was not known. Branch lengths are SNP distances. SNP, single-nucleotide polymorphism.
