# Donor-Derived West Nile Virus Infection in Kidney Transplant Recipients, France, 2025

## Appendix

**Appendix Figure.** Timeline showing the results of all biologic tests performed on donor and 2 recipients in case of donor-derived West Nile virus infection in kidney recipients, France, 2025. Combined results of analyses from the National Reference Center (in-house WNV RT-qPCR test on Panther Fusion; EUROIMMUN ELISA test), the Grenoble laboratory (RT-PCR ELITe MGB kit® - Vircell VIRCLIA monostests for serology) and the Montpellier laboratory (RT-PCR Altona Real Star kit® - EUROIMMUN ELISA test).
