Emerging Infectious Diseases
Policy on Corrections

The Emerging Infectious Diseases journal wishes error-free articles. To that end, we:
1) Make corrections as quickly as we become aware of errors
2) Publish corrections online and in print. Online, we correct the error in the article it occurred with a note that the article was corrected and the date of correction. In print, we prominently publish a full correction, printing all needed information, and provide the URL of the corrected online article for reprints.
For additional information on corrections, send email to eideditor@cdc.gov.

Correction, Vol. 8, No. 3

In Listeria monocytogenes Infection in Israel and Review of Cases Worldwide, by Y. Siegman-Igra et al., an error appears in the discussion section. The corrected sentence appears below and online at http://www.cdc.gov/niced/EID/ vol8no3/01-0195.htm.

The case-fatality rate in the collected data on nonprenatal infection was 36% (413 of 1,149 patients for whom this information was available).

We regret any confusion this error may have caused.
